AMENDMENT IN THE CLAIMS

Claim 1 (currently Amended):

A mop head comprising:

at least two cords, arranged arranged side-by-side and generally parallel to one another defining a layer of cords, wherein at least one cord is formed by twisting at least two filaments together, the filaments being less than 1 denier.

Claim 2 (original):

The mop head of claim 1, wherein the cords are looped.

Claim 3 (original):

The mop head of claim 2, wherein the looped end of each cord is secured to a common surface.

Claim 4 (original):

The mop head of claim 1, wherein at least one cord is at least 1,000 denier.

Claim 5 (original):

The mop head of claim 1, wherein at least one cord is from about 1,000 denier to about 25,000 denier.

Claim 6 (original):

The mop head of claim 1, wherein the filaments are between about 0.02 denier and about 0.99 denier.

Claim 7 (original):

The mop head of claim 1, wherein at least one filament is a polyester material.

Claim 8 (original):

The mop head of claim 1, wherein at least one filament is a nylon material.

Claim 9 (original):

The mop head of claim 1, wherein at least one filament is a combination of a polyester material and a nylon material.

Claim 10 (currently amended):

A mop head comprising:

at least two cords arranged arranged side-by-side and generally parallel to one another defining a layer of cords, wherein the cords are formed by intertwining at least two filaments together, the filaments are split to comprise a core member, a plurality of projections emanating from the core member, and a wedge-shaped insert disposed between every other projection.

Claim 11 (original):

The mop head of claim 10, wherein the cords are looped.

Claim 12 (original):

The mop head of claim 10, wherein at least one cord is at least 1,000 denier.

Claim 13 (original):

The mop head of claim 10, wherein the cords are from about 1,000 denier to about 25,000 denier.

Claim 14 (original):

The mop head of claim 10, wherein the filaments are between about 0.02 denier and about 0.99 denier.

Claim 15 (original):

The mop head of claim 10, wherein at least one filament is a polyester material.

Claim 16 (original):

The mop head of claim 10, wherein at least one filament is a nylon material.

Claim 17 (original):

The mop head of claim 10, wherein at least one filament is a combination of a polyester material and a nylon material.

Claims 18-30 (Canceled)

Claim 31 (new):

The mop head of claim 1, wherein said at least two filaments are split.

Claim 32 (new):

The mop head of claim 1, wherein said at least two filaments are splitable.

Claim 33 (new):

A mop head comprising:

a plurality of cords, each attached at one end to a common surface; and said plurality of cords are formed by intertwining a plurality of individual filaments, wherein said plurality of individual filaments are of less than 1.0 denier.

Claim 34 (new):

The mop head of claim 33, wherein said plurality of individual filaments are split.

Claim 35 (new):

The mop head of claim 33, wherein said plurality of individual filaments are non-split filaments.

Claim 36 (new):

The mop head of claim 33, wherein said plurality of individual filaments are a combination of split and non-split filaments.

Claim 37 (new):

The mop head of claim 33, wherein said plurality of individual filaments are formed by extrusion.

Page 4 of 11

Claim 38 (new):

The mop head of claim 37, wherein said plurality of individual filaments are treated to split.

Claim 39 (new):

The mop head of claim 37, wherein said plurality of individual filaments are formed from at least two different materials.

Claim 40 (new):

The mop head of claim 39, wherein said materials are selected from polyester and nylon.
